Visit Recalls.gov for more information on these and other recalls.

Welcome to the first Robert John & Associates official newsletter! Our hope for this newsletter is to inform you what the firm is currently involved in and advise you of legal news that may affect you, your family, and/or friends. Please feel free to contact us with any information you would like to see in future issues.

2014 was an exciting year at the firm. One of the things we are most proud of is our website. The address is www.RJohnLaw.com. To go along with the new website, the attorneys had new pictures taken! This was not without kicking and screaming on their part, but in the end, the photographer took some great shots.

We started the "Daily Dose of Knowledge" on WITZ Radio (Jasper). This is a weekday radio segment that we sponsor providing the listeners with information they could live without (not a typo), but makes life a little more interesting. The "DDK" can be heard each weekday morning on WITZ at 8:40 CST. Be sure to Tune-in.

We have our radio campaign airing on WIKY, WSTO, and WLFW. We hope you have heard Attorney Rich Hawley on these stations. Speaking of commercials, watch for the new Robert John and Associates commercial. This commercial is very different from our others and we are excited to share it with you. As soon as it is released, you can go to our website to view it (www.RJohnLaw.com/video-center). Watch for more new commercials in the near future.

Susan Gainey-Odoyo was appointed Special Prosecutor for the Animal Cruelty Task Force. She has successfully prosecuted several cases of animal cruelty. The task force's goal is to reduce animal abuse and neglect.

Please like us on Facebook and/or add us to your circles on Google+. Comments on the newsletter or our general posts are welcome and appreciated.

This is an advertisement. This newsletter is not intended to provide legal advice on specific subjects, but rather to provide insight into legal developments and issues. The reader should always consult with legal counsel before taking action on matters covered by this newsletter. You are receiving this communication because you are a current or past client of Robert John and Associates. If you wish to no longer receive newsletters, please call the office to be removed from the mailing list.

Awareness of How Claims Can Arise

DRUG AND DEVICE CLAIMS

Mirena is an IUD that was approved as an intrauterine contraceptive and later approved as a treatment for heavy menstrual bleeding. Serious adverse side effects and potentially life-threatening complications have been reported following implantation of the device. Complications include organ perforation, migration of the IUD to outside the uterus, and expulsion of the IUD, and embedment in the uterus.

Risperdal, an atypical antipsychotic drug, used to treat schizophrenia and certain problems caused by bipolar. Risperdal has been linked to the development of gynecomastia, a condition that causes male breast growth, in boys and young men.

Viagra has had a preliminary study showing that men, who have taken this drug, have an increased risk of developing melanoma, the deadliest form of skin cancer. Men, who used Viagra at some point in their life, have about double the risk of development of melanoma, and men currently taking Viagra have an 84% greater risk.

Lipitor, a statin drug to treat high cholesterol, has recent studies that have found a possible link between Lipitor and developing Type 2 diabetes in postmenopausal women.

PRODUCT LIABILITY CLAIMS

Worker's Compensation Claims often times are more than that. After we investigate the circumstances that caused the injuries, we may discover that a defective machine may be the cause of the injuries. If you or a loved one has been injured at your workplace call us to make sure there is not a third party that is responsible for your loss.

Tractor Trailers and other heavy trucks are not required to meet the same protection standards for occupants as smaller passenger cars. They can contain dangerous defects putting the driver or passengers at risk of serious injury or death. These trucks many times have particularly weak roofs that crush during a rollover. Often the passenger compartments are not protected by effective cab guards, and this allows the load to go inside of the truck cab.

GM Defective Ignition Switch Recall : GM said a heavy key ring or a "jarring event," such as running off the road, could cause the ignition to slip out of position, shutting off the power and causing the airbags to fail in a crash. If you or a loved one drives a GM product, please check immediately if your vehicle is involved in this recall and have it repaired immediately.

If you or a loved one has suffered an injury, talk to an Attorney at Robert John & Associates so you can focus on getting better.

Compliments

We at Robert John & Associates take each case to heart and thank each of you for trusting us with your case. Personal Injury is not just a job for us, it's our passion. The highest compliment, our clients can give us, is to recommend us to a friend. We appreciate your referrals. If you know anyone who needs advice, please give them our number or, better yet, pass on the newsletter. If you would like to receive future issues electronically, as well as a paper copy, please feel free to call the office & we will get you signed up.

THANK YOU FOR BEING OUR CLIENT!!
